

Mental Wellbeing Strategy Scorecard

Designed to help you elevate your workplace wellbeing strategy across 14 key factors that we know contribute to success. In a one hour interview we discuss 14 areas and score you accordingly whether you are Emerging, Developing, Succeeding or Exceeding. This report is the ultimate guide to form and support your strategy and present to C level decision makers.

Why have we introduced the scorecard?

- YOU tell us you are struggling to gain a clear focus on the “what next” in your wellbeing strategy
- YOU ask us for advice and guidance on how to make the biggest impact for your people with the resources available
- YOU are under increased pressure to improve overall wellbeing and culture and gain support from your senior executives and the Board

What the overall score means

We are here to support YOU to deliver your wellbeing strategy. We achieve this through a consultative and solutions led approach based on the individual needs and culture of the organisation.

Based on our experience, knowledge and strong client listening relationships our **mental wellbeing strategy scorecard** can become the foundation of your future plans.
