

Wellbeing Audit

WELLBEING AUDIT

THIS CAN HAPPEN **GLOBAL.**

Designed to help you elevate your workplace wellbeing strategy across 14 key factors that we know contribute to success.

In a 90 minute interview we discuss 14 areas and score you accordingly whether you are **Emerging, Developing, Succeeding or Exceeding**. You will then receive a full report that outlines your score for each category, along with tangible recommendations about how you can improve and elevate your score to the next category.

This report is the ultimate guide to form and support your strategy and present to C level decision makers.

Why have we introduced the audit?

- YOU tell us you are struggling to gain a clear focus on the “what next” in your wellbeing strategy
- YOU ask us for advice and guidance on how to make the biggest impact for your people with the resources available
- YOU are under increased pressure to improve overall wellbeing and culture and gain support from your senior executives and the Board

We are here to support YOU to deliver your wellbeing strategy. We achieve this through a consultative and solutions led approach based on the individual needs and culture of the organisation.

Based on our experience, knowledge and strong client listening relationships our **wellbeing audit** can become the foundation of your future plans.

What the overall score means

0 - 25

Emerging

26 - 50

Developing

51 - 75

Succeeding

76 - 100

Exceeding
